Dear App Store Review Team, thank you for your work.

Token: ATM (ATMChain)
MarketCap: $86,974,286
LaunchDate: 2017-07
Description: ATMChain is an intelligent, trustable and open digital media ecology, which is a creative application of the blockchain technology in the digital media industry. ATMChain uses ATM (Attention Token of Media) as the token to achieve value quantification and value circulation in the ecology.
Website: https://www.atmchain.io/en.html

Token: ETH
MarketCap: $75,198,863,164
LaunchDate: 2014-05
Description: Ethereum is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third party interference.
Website: https://www.ethereum.org

Token: BTC
MarketCap: $279,682,152,750
LaunchDate: 2013-04
Description: Bitcoin is an innovative payment network and a new kind of money. Bitcoin uses peer-to-peer technology to operate with no central authority or banks; managing transactions and the issuing of bitcoins is carried out collectively by the network. Through many of its unique properties, Bitcoin allows exciting uses that could not be covered by any previous payment system.
Website: https://bitcoin.org/en

Token: LTC
MarketCap: $17,366,272,690
LaunchDate: 2013-04
Description: Litecoin is a peer-to-peer Internet currency that enables instant, near-zero cost payments to anyone in the world. Litecoin is an open source, global payment network that is fully decentralized without any central authorities. Mathematics secures the network and empowers individuals to control their own finances. Litecoin features faster transaction confirmation times and improved storage efficiency than the leading math-based currency. With substantial industry support, trade volume and liquidity, Litecoin is a proven medium of commerce complementary to Bitcoin.
Website: https://litecoin.org

Token: ETC
MarketCap: $3,779,285,841
LaunchDate: 2016-07
Description: Ethereum Classic is a decentralized platform that runs smart contracts: applications that run exactly as programmed without any possibility of downtime, censorship, fraud or third party interference
Website: https://ethereumclassic.github.io

Token: BCH
MarketCap: $ 60,863,178,870
LaunchDate:2017-7
Description: Bitcoin Cash brings sound money to the world, fulfilling the original promise of Bitcoin as "Peer-to-Peer Electronic Cash". Merchants and users are empowered with low fees and reliable confirmations. The future shines brightly with unrestricted growth, global adoption, permissionless innovation, and decentralized development.
Website: https://www.bitcoincash.org

Token: OMG
MarketCap: $1,636,946,207
LaunchDate: 2017-07
Description: OmiseGO is a public Ethereum-based financial technology for use in mainstream digital wallets, that enables real-time, peer-to-peer value exchange and payment services agnostically across jurisdictions and organizational silos, and across both fiat money and decentralized currencies.
Website: https://omg.omise.co

Token: DGD
MarketCap: $327,196,000
LaunchDate: 2016-05
Description: Digix tokenizes gold on Ethereum. We leverage the Distributed Ledger for its immutability, transparency and auditability by applying it to precious physical assets. Digix has created a range of technologies including The Proof of Asset Protocol (POA) and Digix Gold Tokens (DGX) on Ethereum.
Website: https://digix.global

Token:MKR
MarketCap:$241,184,365.10
LaunchDate:2016-6

Description:Maker is a decentralized autonomous organization on the Ethereum blockchain seeking to minimize the price volatility of its own stable token — the Dai — against the IMF's international currency basket SDR.
Website: https://makerdao.com

Token: REP
MarketCap: $878,710,800
LaunchDate:2017-5
Description: Augur combines the magic of prediction markets with the power of a decentralized network to create a stunningly accurate forecasting tool - and the chance for real money trading profits
Website: https://augur.net

Token: GNT
MarketCap: $ 407,337,653
LaunchDate:2016-11
Description: Golem is a global, open sourced, decentralized supercomputer that anyone can access. It's made up of the combined power of user's machines, from personal laptops to entire datacenters.
Website: https://golem.network

Token: 1ST
MarketCap: $ 52,963,711
LaunchDate:2016-9

Description:We want to build an environment in which people can be happy and love what they do. For us it is just as important that our team grows together the product.Learn a lot and be respectful. We know that teamwork is better than a solo gig, which is why we value team play. We also value creativity, which is why we'll give you space and time to be productive. And yes, break things and ship fast.
Website: https://firstblood.io/#/home

Token: ANT
MarketCap: $ 95,438,133
LaunchDate:2017-5

Description: We believe Decentralized organizations can solve the world's worst problems. That's why we are building Aragon.Aragon lets you manage entire organizations using the blockchain. This makes Aragon organizations more efficient than their traditional counterparties.By making it possible for everyone in the world to organize, we are enabling the borderless, permissionless creation of value.

Website: https://aragon.one

Token: MYST
MarketCap: $ 26,291,161
LaunchDate:2017-6

Description: Open Sourced Network allowing anyone to rent their unused Network traffic, while providing a secure connection for those in need.

Website: https://mysterium.network

Token: BAT
MarketCap: $ 333,376,000
LaunchDate:2017-6
Description: Basic Attention Token radically improves the efficiency of digital advertising by creating a new token that can be exchanged between publishers, advertisers, and users. It all happens on the Ethereum blockchain. The token can be used to obtain a variety of advertising and attention-based services on the Brave platform. The utility of the token is based on user attention, which simply means a person's focused mental engagement.
Website: https://basicattentiontoken.org

Token: SNT
MarketCap: $ 578,005,604
LaunchDate:2017-6

Description: Browse, chat and make payments securely on the decentralized web.

Status, the Ethereum discovery tool.

Website: https://status.im

Token: EOS
MarketCap: $ 6,119,609,060

LaunchDate:2017-7

Description: EOS.IO is software that introduces a blockchain architecture designed to enable vertical and horizontal scaling of decentralized applications (the "EOS.IO Software"). This is achieved through an operating system-like construct upon which applications can be built. The software provides accounts, authentication, databases, asynchronous communication and the scheduling of applications across multiple CPU cores and/or clusters. The resulting technology is a blockchain architecture that has the potential to scale to millions of transactions per second, eliminates user fees and allows for quick and easy deployment of decentralized applications. For more information, please read the EOS.IO Technical White Paper.

Website: https://eos.io

.

Token: PAY
MarketCap: $ 306,608,447
LaunchDate:2017-7

Description:TenX supports blockchain assets across multiple blockchains. We currently support Bitcoin, Ethereum, Ethereum ERC20 Tokens (DGX, REP, TRUST, ANT, etc.), DASH – many more are coming.

Website: https://www.tenx.tech

Token: BTM
MarketCap: $ 316,567,419
LaunchDate:2017-8

Description: Bytom is an interactive protocol of multiple byte assets. Heterogeneous byte-assets (indigenous digital currency, digital assets) that operate in different forms on the Bytom Blockchain and atomic assets (warrants, securities, dividends, bonds, intelligence information, forecasting information and other information that exist in the physical world) can be registered, exchanged, gambled and engaged in other more complicated and contract-based interoperations via Bytom.

Website: http://bytom.io

Token: CREDO
MarketCap: $ 25,726,133
LaunchDate:2017-9

Description: Spam email demands your attention for free. Not anymore. Now be compensated with the token Credo through the cryptocurrency spam solution BitBounce. Credos create a market for email that allows users to charge to recieve emails from unknown senders.
Website: https://bitbounce.com/credo

Token: LRC
MarketCap: $ 89,468,711
LaunchDate:2017-8

Description: Loopring is not only a protocol but also a decentralized automated execution system that trades across the crypto-token exchanges, shielding users from counterparty risk and reducing the cost of trading. By pooling the liquidity of cryptocurrencies, we are building the financial system of the future.
Website: https://loopring.org/en/index.html

Token: MANA
MarketCap: $ 217,148,894
LaunchDate:2017-9

Description: Decentraland is the first virtual platform owned by its users.
Grab a VR headset or use your web browser and become completely immersed in a 3D, interactive world
Website: https://decentraland.org

Token: DPY
MarketCap: $ 69,911,075
LaunchDate:2017-11

Description: Delphy is an open-source,decentralized,mobile prediction market platform built on Ethereum.The Delphy App is a light Ethereum node that runs on mobile devices.

Website: https://delphy.org/en/

Token: BNT
MarketCap: $ 178,432,275
LaunchDate:2017-6

Description: Bancor is a Decentralized Liquidity Network that allows you to hold any Ethereum token and convert it to any other token in the network, with no counter party, at an automatically calculated price, using a simple web wallet.

Website: https://www.bancor.network

Token: QTUM
MarketCap: $ 4,382,240,927
LaunchDate:2017-5

Description: Build Decentralized Applications that Simply Work

Executable on mobile devices, compatible with major existing blockchain ecosystems

Website: https://qtum.org/en/

Token: KNC
MarketCap: $ 326,611,776
LaunchDate:2017-9

Description: kyberNetwork is a new system which allows the exchange and conversion of digital assets.We provide rich payment APIs and a new contact wallet that allow anyone to seamlessly receive payments from any token.

Website: https://kyber.network

Token: ICN
MarketCap: $ 205,942,125
LaunchDate:2016-9

Description: The ICONOMI Digital Assets Management Platform is a new and unique technical service that allows anyone from beginners to blockchain experts to invest in and manage digital assets.ICONOMI is more than just a marketplace for digital assets. We provide the best experience and simplest method for entering the growing distributed economy.With a broad set of unique and intuitive tools for people of any skill level, ICONOMI enables users to invest in and manage various digital assets and combinations of digital assets called Digital Asset Arrays™.
Website: https://www.iconomi.net

Token: MTL
MarketCap: $ 158,406,925
LaunchDate:2017-7

Description: METAL (MTL) is our native currency. METAL is fairly distributed through a process known as: Proof of Processed Payments (PoPP). When you send money or make purchases you earn a little reward in METAL for every dollar you spend.
Website: https://www.metalpay.com

Token: CVC
MarketCap: $ 177,547,730
LaunchDate:2017-7

Description: Through our decentralized architecture with the blockchain and biometrics on the mobile device, our platform provides multi-factor authentication without a username, password, third party authenticator, or physical hardware token
Website: https://www.civic.com

Token: ZRX
MarketCap: $ 247,575,500
LaunchDate:2017-8

Description: 0x is an open, permissionless protocol allowing for ERC20 tokens to be traded on the Ethereum blockchain.

Website: https://0xproject.com

Token: QASH
MarketCap: $ 313,653,550
LaunchDate:2017-11

Description: The next Bitcoin or Ethereum for financial services. We envision QASH to be the preferred payment token for financial services,like the Bitcoin for financial services.As more financial institutions, fintech startups and partners adopt QASH as a method of payment, the utility of QASH will scale, fueling the Fintech revolution. Website: https://liquid.plus

Token: OTC
Website: https://otc.one
(have not on market now)
